

V-Lock Spec Sheet

Description: The V-Lock was designed to limit the access to 2" operating nuts on gate valves in the ground. This device is lowered down into the 6" tube of a gate valve where the operating nut would be and placed over the operating nut with a special tool called the V-Lock Wrench. Once placed over the operating nut then the V-lock remains in position to limit the on and off of the gate valve or zone valve in the distribution system. This device works well with lock out tag outs during the maintenance of the water system you don't want in operation.

Component Material: A356 Aluminum heat treated to T-6 Temper.

Applications: Zone Valves, Gate Valves, most operating nuts with a 2" square operating nut. Typical application would be utilized in would be a valve or component installed 3 feet or deeper.

Sizes Available: 2" Square operating nut.

Weight of Product: 5 Lbs.

Warranty: Hydra Shield V-Locks are warranted for one year from the date of purchase against any defect in workmanship.
