

# CRITICAL VALVE LOCK

The **Critical Valve Lock (V-Lock)** is a patented water distribution security device that is designed to limit the access of operating nuts on underground gate valves in the water distribution system. The V-Lock is lowered onto a critical gate valve to provide either a long or short term lock out / tag out system of the operating nut. The V-Lock is designed to secure the on or off position of gate valves in critical water zones where control is required.

**Material:** A356 Aluminum and heat treated to a T6 temper.

**Available Size:** square or pentagon operating nut.

**THE V-LOCK WRENCH** is a tool that is designed to be used **exclusively** for the installation and removal of our patented V-Lock device. The 4'-6' **adjustable** pole is made of durable fiberglass with a poly grip handle.
