

HYDRA SHIELD

HYDRA STORZ ADAPTER

A The **Hydra Storz Adapter** is designed to be a **permanent** Storz hydrant converter without the use of a blind cap, with a built-in patented butterfly mechanism, safeguarding the hydrant against foreign objects from entering the hydrant without a blind cap.

If a hydrant requires to be pressurized for maintenance, or the use of a 2.5" hose connection is required, a blind cap can be utilized on the LDH steamer port while not being used.

Available sizes: 4" and 5" Storz with either 4.0 or 4.5 NST (custom threads available).

B Protect your Storz connection with **Hydra-Snap-Cap**. These lightweight, inexpensive, maintenance-free, highly-visible plastic caps keep mud, road grime, ice, and snow off the Storz lugs.
