

HYDRA  SHIELD

# HYDRANT SECURITY CAP

The **Hydra-Shield Security Cap** is a virtually indestructible water distribution security device that is designed to protect fire hydrant from water theft from unauthorized use of the fire hydrant. These caps connect seamlessly to both small and large hydrant outlet sizes and the **only** way to remove the Hydra-Shield Security Cap is by the use of a special designed Hydra-Shield Security Cap Wrench.

The patented **Hydra-Shield Security Cap Wrench** is a unique tool that is designed to be used exclusively for the installation and removal of Hydra-Shield Security Caps. This wrench also features a built-in socket for the specified shape and size of the operating nut to open and close the fire hydrant.
