

NYLON CAPS

Nylon Hydrant Caps are a low-maintenance way of protecting fire hydrant thread connections against foreign debris, including dirt and ice accumulation. These lightweight, impact-resistant NST or custom-thread Nylon Caps can withstand normal hydrant operating pressure and have no scrap value, providing a theft-deterrent alternative to traditional metal cap.

Operating Pressure: 250 psi

Available Sizes: Standard stocked sizes with NST threads are available for 2.5", 4", and 4.5" hydrant outlets. Custom threads are available in all sizes.

Available Colors: red, orange, yellow, green, and blue
