

PRE-CON 30 INTAKE VALVE

The **Pre-Con 30 Valve** is a patented, automatic intake valve designed to automatically adjust water flow, without losing prime or the need for manual adjustments using hard suction hose during drafting operations. The intake valve has three positions with the movement of one simple handle; fully closed, open, or float.

Material: A356 Aluminum and heat treated to a T6 temper.

Applications: Drafting and hydrant supply operations.

Available Sizes: 4" NH, 4.5" NH, 5" NH, and 6" NH.
