

SECUREFLOW CAP

The **SecureFlow Cap** is a hydrant nozzle security system that prevents water system threats by locking up the nozzles and main steamer of a fire hydrant. A specially designed wrench is provided to open the secure flow caps. This combo wrench can also be used for other operations, including Storz adaptors and op nut operations.

Material: High Quality 6061-T6 Aluminum

Available Size: 2.5", 4", and 4.5"
